

hyperbaric oxygen therapy

Research Consent

We participate in ongoing research as to the efficacies of Hyperbaric Oxygen Therapy (HBOT), particularly with regard to Autism, Asperger's, ADD/ADHD, Cerebral Palsy and other neurological disorders. We try to document our patients before and after with video, pictures and questionnaires. This is always done anonymously unless we have express written permission. Copies of all of these materials are available to the individual patient at no charge. By signing below, you consent to the use of your information and images for the purpose of research and education with the understanding that you will not be identified by name.

Signature of patient/client or parent/guardian
